SOFTWARE ASSURANCE

Our team specializes in the assurance of software products. We have deep expertise in application security, software quality assurance (SQA), and independent verification & validation (IV&V) across a broad range of languages and frameworks. Most notably, we excel in the automation of these processes and work with academic centers of excellence for research into new practices and technologies.

AGILE PROJECT MANAGEMENT

Our certified professionals have unparalleled in-depth expertise with OI&T project management tools and methodologies. Members of our team have worked intimately with these since their earliest versions and led multiple VA Agile development programs under them.

DATA MANAGEMENT AND INTEGRATION

Data solutions including database administration, disaster recovery, decision support, electronic data interchange (EDI), advanced dashboards, and more. Integration expertise with VistA and numerous COTS/GOTS products.

AGILE SOFTWARE ENGINEERING

We engineer solutions that are secure, accessible and reliable. We have the proven talent and expertise to surpass your expectations and are strong advocates of prototyping and the "lean" approach to software engineering leveraging modern technologies such as Node.js, Python, Java, C#, etc. Rapid delivery, innovation, and quality are our hallmarks.

CYBER SECURITY & INFORMATION ASSURANCE

Certified expert risk analyses, software assessments, vulnerability scanning, penetration testing, and more in accordance with VA Handbook 6500 and the NIST RMF.

NETIZEN PROGRAM EXPERIENCE

Office of Information & Technology (OI&T) Product Development
